

Gas Meter House

Herrick Archives Number H 468

This building is a gas meter house that preceded S 45. It was located south of Goss Laboratory (180). See sketch below. See Sheet 93 (July 1963 revision) in the book of campus maps in the University Archives.

See Addendum No. 1

For identification of other buildings shown, see Appendix A.

Various maps indicate that the building was 10-18 feet wide x 18-20 feet long. A notation on the Olentangy Freeway plans indicates that it was constructed of concrete block.

Date of construction of the building has not been ascertained. Examination of photographs show that it was not there as late as March 1947, but it does appear on pictures of construction of Sisson Hall (080) in December 1955.

Records kept by Theodore Kauer, Expressway Coordinator for the University, indicate that the building was demolished by the Olentangy Expressway contractor during the week of November 16, 1970.
